

Where the Conversion Leaks Are

allwayswireless.com · CRO Recommendations · August 2026

The most valuable conversion mechanism on this site is the product-to-cart-to-checkout path, but it is bleeding value because the cart page is a dead end with no cart contents or checkout button, and product pages show a placeholder price of \$1, making it impossible for users to make a purchase decision.

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
